WEBINAR CALENDAR

Schedule of Dates and Topics

FEBRUARY 23, 2021
The Top Trends in KM for 2021
From the growth of cloud computing and mobile workers to the rise of new collaboration tools and intelligent search technologies, the world of knowledge management continues to evolve and, along with it, come new challenges and opportunities. Join us for this look at how the top trends in KM and information discovery can impact your organization.

APRIL 13, 2021
Modernizing Your KM Strategy for Digital Transformation
New technologies are providing the opportunity for budding entrepreneurs and established enterprises alike to develop new business models and processes that change the old way of running operations and improve how customers are served. However, at the end of the day, digital transformation is about how you work with new tools and across teams. To work smarter and faster, you need knowledge management to ensure that information is not only easily accessible to foster greater productivity and collaboration, but can be trusted to inform action.

JUNE 15, 2021
Unlocking the Power of Intelligent Enterprise Search
Cognitive search and analytics can provide you with unique business advantages over your rivals. It can drive effective customer self-service, provide your customer support teams with necessary and timely insights, and unlock important information necessary to drive innovation in your enterprise. Join us as we help you evaluate where, when, and how to use cognitive search and analytics in your organization.

AUGUST 17, 2021
Harnessing Cognitive Computing and AI
A new era of cognitive computing is unfolding, and its impact is already being felt across industries, from preventative maintenance at manufacturing plants, to patient diagnosis at hospitals and the rise of sophisticated chatbots ready to assist us across the connected world. The goal of cognitive computing is straightforward: to simulate human thought processes in a computerized model. However, building, refining, and reaping business value from cognitive computing systems and applications add up to another story.

OCTOBER 12, 2021
Game-Changing Breakthroughs in Knowledge Management
A renewed enthusiasm about knowledge management is evident, particularly in the digital workplace. Discovering the value in corporate knowledge is amplified by new technologies, such as text analytics, cognitive search, machine learning, natural language processing, mobile email management, and new policy efforts. Attend this webinar to discover game-changing breakthroughs to bring knowledge management to the next level in your organization to boost business performance.

DECEMBER 7, 2021
Entering the New World of Enterprise Content Management
Good content management plays a pivotal role in an organization’s ability to manage input and output of information and can make the difference in whether the company understands its content value, or whether it’s lost in the weeds. We will opt for the former and find ways to help organizations reconstruct their ECM programs so that information does not go to waste.
